SUBJECT INDEX

Abrasives

Abrasion Resistance of Concrete, P. Laplante, P. -C. Aïtcin and D. Vézina, MT Feb. 91, p19-28.

Acidic water

Strength and Durability of Sulfur Mortar, Abdul-Hamid J. Al-Tayyib, Moneer F. Tewfik and Mohammad Shamim Khan, MT May 91, p154-164.

Acoustic waves

In Situ Field Testing for Fracture Properties of Dam Concrete, Victor E. Saouma, Jerry J. Broz and Howard L. Boggs, MT Aug. 91, p219-234.

Aggregates

Abrasion Resistance of Concrete, P. Laplante, P. -C. Aïtcin and D. Vézina, MT Feb. 91, p19-28.

Effect of Aggregate and Specimen Size on Fracture Properties of Dam Concrete, Victor E. Saouma, Jerry J. Broz, Eugene Brühwiler and Howard L. Boggs, MT Aug. 91, p204-218.

Aging

Comparisons of Silicone and Urethane Sealant Durabilities, L. Bogue Sandberg, MT Nov. 91, p278-291.

Alkalinity

Fly Ash and Cation Effects on Free Cl^- and OH^- Concentrations in Mortars, O. A. Kayyali, M. Kawamura and M. N. Haque, MT May 91, p113-124.

Asphalts

SEM Analysis on Fracture and Healing of Sand-Asphalt Mixtures, Y. Richard Kim, Dallas N. Little and R. C. Burghardt, MT May 91, p140-153.

Beams

Transverse Isotropy Modeling of 3-D Glulam Timber Beams, J. F. Davalos, J. R. Loferski, S. M. Holzer and V. Yadama, MT May 91, p125-139.

Binders, materials

SEM Analysis on Fracture and Healing of Sand-Asphalt Mixtures, Y. Richard Kim, Dallas N. Little and R. C. Burghardt, MT May 91, p140-153.

Brittleness

Fracture Model Evaluation of Dam Concrete, Eugene Brühwiler, Jerry J. Broz and Victor E. Saouma, MT Nov. 91, p235-251.

Buckling

Ultimate Bending Strength of Composite Beams, Ever J. Barbero, Shin-Ham Fu and Ioannis Raftoyiannis, MT Nov. 91, p292-306.

Carbonation

Effect of Curing and Composition on Outer Skin of Concrete, A. Bentur and C. Jaegermann, MT Nov. 91, p252-262.

Cations

Fly Ash and Cation Effects on Free Cl^- and OH^- Concentrations in Mortars, O. A. Kayyali, M. Kawamura and M. N. Haque, MT May 91, p113-124.

Cements

Fly Ash and Cation Effects on Free Cl^- and OH^- Concentrations in Mortars, O. A. Kayyali, M. Kawamura and M. N. Haque, MT May 91, p113-124.

Chlorides

Fly Ash and Cation Effects on Free Cl^- and OH^- Concentrations in Mortars, O. A. Kayyali, M. Kawamura and M. N. Haque, MT May 91, p113-124.

Composite beams

Ultimate Bending Strength of Composite Beams, Ever J. Barbero, Shin-Ham Fu and Ioannis Raftoyiannis, MT Nov. 91, p292-306.

Compressive strength

Review of Variables that Influence Measured Concrete Compressive Strength, David N. Richardson, MT May 91, p95-112.

Concrete

Abrasion Resistance of Concrete, P. Laplante, P. -C. Aïtcin and D. Vézina, MT Feb. 91, p19-28.

Confirmation of TICC Damage Hypothesis—Petrographic Study, Alfarabi Sharif, MT Aug. 91, p179-188.

Effect of Curing and Composition on Outer Skin of Concrete, A. Bentur and C. Jaegermann, MT Nov. 91, p252-262.

New Method for Measuring Pore Size Distributions in Concrete, Brett W. Gunnink, MT Nov. 91, p307-319.

Pseudoductility of Fiber Reinforced Concrete, Antonio Nanni, MT Feb. 91, p78-90.

Review of Variables that Influence Measured Concrete Compressive Strength, David N. Richardson, MT May 91, p95-112.

Concrete durability

Confirmation of TICC Damage Hypothesis—Petrographic Study, Alfarabi Sharif, MT Aug. 91, p179-188.

Concrete properties

Effect of Aggregate and Specimen Size on Fracture Properties of Dam Concrete, Victor E. Saouma, Jerry J. Broz, Eugene Brühwiler and Howard L. Boggs, MT Aug. 91, p204-218.

In Situ Field Testing for Fracture Properties of Dam Concrete, Victor E. Saouma, Jerry J. Broz and Howard L. Boggs, MT Aug. 91, p219-234.

Concrete, reinforced

Uncertainty in Flexural Capacity Prediction of Ferrocement Elements, Ser-Tong Quek and Seng-Hooi On, MT Nov. 91, p263-277.

Consolidation
Review of Variables that Influence Measured Concrete Compressive Strength, David N. Richardson, MT May 91, p95-112.

Construction methods
PCC Pavement Patching Materials and Procedures, Frazier Parker, Jr. and W. Lee Shoemaker, MT Feb. 91, p29-47.

Crack initiation
Fatigue Crack Initiation—Propagation Reliability Model, W. Scott Martin and Paul H. Wirsching, MT Feb. 91, p1-18.

Crack propagation
Fatigue Crack Initiation—Propagation Reliability Model, W. Scott Martin and Paul H. Wirsching, MT Feb. 91, p1-18.

Pseudoductility of Fiber Reinforced Concrete, Antonio Nanni, MT Feb. 91, p78-90.

Cracking
Confirmation of TICC Damage Hypothesis—Petrographic Study, Alfarabi Sharif, MT Aug. 91, p179-188.

Uncertainty in Flexural Capacity Prediction of Ferrocement Elements, Ser-Tong Quek and Seng-Hooi On, MT Nov. 91, p263-277.

Cracks
Pseudoductility of Fiber Reinforced Concrete, Antonio Nanni, MT Feb. 91, p78-90.

Creep
Laboratory Evaluation of Reclaimed Rubber Asphaltic Concrete Mixes, H. Al-Abdul-Wahhab and G. Al-Amri, MT Aug. 91, p189-203.

Curing
Effect of Curing and Composition on Outer Skin of Concrete, A. Bentur and C. Jaegermann, MT Nov. 91, p252-262.

SEM Analysis on Fracture and Healing of Sand-Asphalt Mixtures, Y. Richard Kim, Dallas N. Little and R. C. Burghardt, MT May 91, p140-153.

Cylinders
Review of Variables that Influence Measured Concrete Compressive Strength, David N. Richardson, MT May 91, p95-112.

Dams, concrete
Effect of Aggregate and Specimen Size on Fracture Properties of Dam Concrete, Victor E. Saouma, Jerry J. Broz, Eugene Brühwiler and Howard L. Boggs, MT Aug. 91, p204-218.

Fracture Model Evaluation of Dam Concrete, Eugene Brühwiler, Jerry J. Broz and Victor E. Saouma, MT Nov. 91, p235-251.

In Situ Field Testing for Fracture Properties of Dam Concrete, Victor E. Saouma, Jerry J. Broz and Howard L. Boggs, MT Aug. 91, p219-234.

Failure modes
Ultimate Bending Strength of Composite Beams, Ever J. Barbero, Shin-Ham Fu and Ioannis Raftoyiannis, MT Nov. 91, p292-306.

Fatigue
Comparisons of Silicone and Urethane Sealant Durabilities, L. Bogue Sandberg, MT Nov. 91, p278-291.

Effect of Curing and Composition on Outer Skin of Concrete, A. Bentur and C. Jaegermann, MT Nov. 91, p252-262.

Fatigue Crack Initiation—Propagation Reliability Model, W. Scott Martin and Paul H. Wirsching, MT Feb. 91, p1-18.

Laboratory Evaluation of Reclaimed Rubber Asphaltic Concrete Mixes, H. Al-Abdul-Wahhab and G. Al-Amri, MT Aug. 91, p189-203.

SEM Analysis on Fracture and Healing of Sand-Asphalt Mixtures, Y. Richard Kim, Dallas N. Little and R. C. Burghardt, MT May 91, p140-153.

Strength and Durability of Sulfur Mortar, Abdul-Hamid J. Al-Tayyib, Moneer F. Tewfik and Mohammad Shamim Khan, MT May 91, p154-164.

Fiber reinforced materials
Pseudoductility of Fiber Reinforced Concrete, Antonio Nanni, MT Feb. 91, p78-90.

Strength, Toughness: Mineral Wool-Polyethylene Pulp-Reinforced Mortars, Robert Nicholls, MT Nov. 91, p320-330.

Fibers
Strength, Toughness: Mineral Wool-Polyethylene Pulp-Reinforced Mortars, Robert Nicholls, MT Nov. 91, p320-330.

Field tests
PCC Pavement Patching Materials and Procedures, Frazier Parker, Jr. and W. Lee Shoemaker, MT Feb. 91, p29-47.

Fills
Strength and Durability of Sulfur Mortar, Abdul-Hamid J. Al-Tayyib, Moneer F. Tewfik and Mohammad Shamim Khan, MT May 91, p154-164.

Flexure
Uncertainty in Flexural Capacity Prediction of Ferrocement Elements, Ser-Tong Quek and Seng-Hooi On, MT Nov. 91, p263-277.

Flow
Early Age Properties of Pozzolanic Mortars under Hot Weather, Jihad S. Sawan and Hisham Y. Qasrawi, MT Aug. 91, p165-178.

Fly ash
Fly Ash and Cation Effects on Free Cl^- and OH^- Concentrations in Mortars, O. A. Kayyali, M. Kawamura and M. N. Haque, MT May 91, p113-124.

Selective Dissolution of Portland–Fly-Ash Cements, Bruce A. Suprenant and George Papadopoulos, MT Feb. 91, p48-59.

Fracture mechanics
Effect of Aggregate and Specimen Size on Fracture Properties of Dam Concrete, Victor E. Saouma, Jerry J. Broz, Eugene Brühwiler and Howard L. Boggs, MT Aug. 91, p204-218.

Fracture Model Evaluation of Dam Concrete, Eugene Brühwiler, Jerry J. Broz and Victor E. Saouma, MT Nov. 91, p235-251.

In Situ Field Testing for Fracture Properties of Dam Concrete, Victor E. Saouma, Jerry J. Broz and Howard L. Boggs, MT Aug. 91, p219-234.

Fracture strength

Effect of Aggregate and Specimen Size on Fracture Properties of Dam Concrete, Victor E. Saouma, Jerry J. Broz, Eugene Brühwiler and Howard L. Boggs, MT Aug. 91, p204-218.

Fracture Model Evaluation of Dam Concrete, Eugene Brühwiler, Jerry J. Broz and Victor E. Saouma, MT Nov. 91, p235-251.

In Situ Field Testing for Fracture Properties of Dam Concrete, Victor E. Saouma, Jerry J. Broz and Howard L. Boggs, MT Aug. 91, p219-234.

Fractures

SEM Analysis on Fracture and Healing of Sand-Asphalt Mixtures, Y. Richard Kim, Dallas N. Little and R. C. Burghardt, MT May 91, p140-153.

Hydration

Early Age Properties of Pozzolanic Mortars under Hot Weather, Jihad S. Sawan and Hisham Y. Qasrawi, MT Aug. 91, p165-178.

In situ tests

In Situ Field Testing for Fracture Properties of Dam Concrete, Victor E. Saouma, Jerry J. Broz and Howard L. Boggs, MT Aug. 91, p219-234.

Isotropic material

Transverse Isotropy Modeling of 3-D Glulam Timber Beams, J. F. Davalos, J. R. Loferski, S. M. Holzer and V. Yadama, MT May 91, p125-139.

Joints

Comparisons of Silicone and Urethane Sealant Durabilities, L. Bogue Sandberg, MT Nov. 91, p278-291.

Joints, nailed

Generalized Model for Lateral Load Slip of Nailed Joints, Patrick J. Pellicane, Jeffery L. Stone and M. Daniel Vanderbilt, MT Feb. 91, p60-77.

Laboratory tests

Effect of Aggregate and Specimen Size on Fracture Properties of Dam Concrete, Victor E. Saouma, Jerry J. Broz, Eugene Brühwiler and Howard L. Boggs, MT Aug. 91, p204-218.

Laboratory Evaluation of Reclaimed Rubber Asphaltic Concrete Mixes, H. Al-Abdul-Wahhab and G. Al-Amri, MT Aug. 91, p189-203.

PCC Pavement Patching Materials and Procedures, Frazier Parker, Jr. and W. Lee Shoemaker, MT Feb. 91, p29-47.

Laminated wood

Transverse Isotropy Modeling of 3-D Glulam Timber Beams, J. F. Davalos, J. R. Loferski, S. M. Holzer and V. Yadama, MT May 91, p125-139.

Lateral loads

Generalized Model for Lateral Load Slip of Nailed Joints, Patrick J. Pellicane, Jeffery L. Stone and M. Daniel Vanderbilt, MT Feb. 91, p60-77.

Load tests

Pseudoductility of Fiber Reinforced Concrete, Antonio Nanni, MT Feb. 91, p78-90.

Materials testing

PCC Pavement Patching Materials and Procedures, Frazier Parker, Jr. and W. Lee Shoemaker, MT Feb. 91, p29-47.

Strength and Durability of Sulfur Mortar, Abdul-Hamid J. Al-Tayyib, Moneer F. Tewfik and Mohammad Shamim Khan, MT May 91, p154-164.

Mathematical models

Transverse Isotropy Modeling of 3-D Glulam Timber Beams, J. F. Davalos, J. R. Loferski, S. M. Holzer and V. Yadama, MT May 91, p125-139.

Uncertainty in Flexural Capacity Prediction of Ferrocement Elements, Ser-Tong Quek and Seng-Hooi On, MT Nov. 91, p263-277.

Measurement

New Method for Measuring Pore Size Distributions in Concrete, Brett W. Gunnink, MT Nov. 91, p307-319.

Mixtures

Selective Dissolution of Portland–Fly-Ash Cements, Bruce A. Suprenant and George Papadopoulos, MT Feb. 91, p48-59.

Strength and Durability of Sulfur Mortar, Abdul-Hamid J. Al-Tayyib, Moneer F. Tewfik and Mohammad Shamim Khan, MT May 91, p154-164.

Models

Fracture Model Evaluation of Dam Concrete, Eugene Brühwiler, Jerry J. Broz and Victor E. Saouma, MT Nov. 91, p235-251.

Generalized Model for Lateral Load Slip of Nailed Joints, Patrick J. Pellicane, Jeffery L. Stone and M. Daniel Vanderbilt, MT Feb. 91, p60-77.

Ultimate Bending Strength of Composite Beams, Ever J. Barbero, Shin-Ham Fu and Ioannis Raftoyiannis, MT Nov. 91, p292-306.

Mortars

Abrasion Resistance of Concrete, P. Laplante, P.-C. Aïtcin and D. Vézina, MT Feb. 91, p19-28.

Early Age Properties of Pozzolanic Mortars under Hot Weather, Jihad S. Sawan and Hisham Y. Qasrawi, MT Aug. 91, p165-178.

Fly Ash and Cation Effects on Free Ca^{+} and OH^{-} Concentrations in Mortars, O. A. Kayyali, M. Kawamura and M. N. Haque, MT May 91, p113-124.

Strength and Durability of Sulfur Mortar, Abdul-Hamid J. Al-Tayyib, Moneer F. Tewfik and Mohammad Shamim Khan, MT May 91, p154-164.

Strength, Toughness: Mineral Wool-Polyethylene Pulp-Reinforced Mortars, Robert Nicholls, MT Nov. 91, p320-330.

Pavement deterioration
PCC Pavement Patching Materials and Procedures, Frazier Parker, Jr. and W. Lee Shoemaker, MT Feb. 91, p29-47.

Pavements
PCC Pavement Patching Materials and Procedures, Frazier Parker, Jr. and W. Lee Shoemaker, MT Feb. 91, p29-47.

Petrographic analysis
Confirmation of TICC Damage Hypothesis—Petrographic Study, Alfarabi Sharif, MT Aug. 91, p179-188.

Plastics
Comparisons of Silicone and Urethane Sealant Durabilities, L. Bogue Sandberg, MT Nov. 91, p278-291.

Polyethylene
Strength, Toughness: Mineral Wool-Polyethylene Pulp-Reinforced Mortars, Robert Nicholls, MT Nov. 91, p320-330.

Polymers
Comparisons of Silicone and Urethane Sealant Durabilities, L. Bogue Sandberg, MT Nov. 91, p278-291.

Pore size distribution
New Method for Measuring Pore Size Distributions in Concrete, Brett W. Gunnink, MT Nov. 91, p307-319.

Porosity
New Method for Measuring Pore Size Distributions in Concrete, Brett W. Gunnink, MT Nov. 91, p307-319.

Porous materials
New Method for Measuring Pore Size Distributions in Concrete, Brett W. Gunnink, MT Nov. 91, p307-319.

Portland cements
New Method for Measuring Pore Size Distributions in Concrete, Brett W. Gunnink, MT Nov. 91, p307-319.

PCC Pavement Patching Materials and Procedures, Frazier Parker, Jr. and W. Lee Shoemaker, MT Feb. 91, p29-47.

Selective Dissolution of Portland–Fly-Ash Cements, Bruce A. Suprenant and George Papadopoulos, MT Feb. 91, p48-59.

Predictions
Generalized Model for Lateral Load Slip of Nailed Joints, Patrick J. Pellicane, Jeffery L. Stone and M. Daniel Vanderbilt, MT Feb. 91, p60-77.

Properties
Early Age Properties of Pozzolanic Mortars under Hot Weather, Jihad S. Sawan and Hisham Y. Qasrawi, MT Aug. 91, p165-178.

Pultrusion
Ultimate Bending Strength of Composite Beams, Ever J. Barbero, Shin-Ham Fu and Ioannis Raftoyiannis, MT Nov. 91, p292-306.

Quality control
Review of Variables that Influence Measured Concrete Compressive Strength, David N. Richardson, MT May 91, p95-112.

Selective Dissolution of Portland–Fly-Ash Cements, Bruce A. Suprenant and George Papadopoulos, MT Feb. 91, p48-59.

Quantitative analysis
Selective Dissolution of Portland–Fly-Ash Cements, Bruce A. Suprenant and George Papadopoulos, MT Feb. 91, p48-59.

Reliability analysis
Fatigue Crack Initiation—Propagation Reliability Model, W. Scott Martin and Paul H. Wirsching, MT Feb. 91, p1-18.

Repairing
PCC Pavement Patching Materials and Procedures, Frazier Parker, Jr. and W. Lee Shoemaker, MT Feb. 91, p29-47.

Resilience
Laboratory Evaluation of Reclaimed Rubber Asphaltic Concrete Mixes, H. Al-Abdul-Wahhab and G. Al-Amri, MT Aug. 91, p189-203.

Resistance
Abrasion Resistance of Concrete, P. Laplante, P. -C. Aïtcin and D. Vézina, MT Feb. 91, p19-28.

Rubber modified asphalt
Laboratory Evaluation of Reclaimed Rubber Asphaltic Concrete Mixes, H. Al-Abdul-Wahhab and G. Al-Amri, MT Aug. 91, p189-203.

Salts
Strength and Durability of Sulfur Mortar, Abdul-Hamid J. Al-Tayyib, Moneer F. Tewfik and Mohammad Shamim Khan, MT May 91, p154-164.

Samples
Effect of Aggregate and Specimen Size on Fracture Properties of Dam Concrete, Victor E. Saouma, Jerry J. Broz, Eugene Brühwiler and Howard L. Boggs, MT Aug. 91, p204-218.

Sand
SEM Analysis on Fracture and Healing of Sand-Asphalt Mixtures, Y. Richard Kim, Dallas N. Little and R. C. Burghardt, MT May 91, p140-153.

Strength and Durability of Sulfur Mortar, Abdul-Hamid J. Al-Tayyib, Moneer F. Tewfik and Mohammad Shamim Khan, MT May 91, p154-164.

Scanning electron microscopes
SEM Analysis on Fracture and Healing of Sand-Asphalt Mixtures, Y. Richard Kim, Dallas N. Little and R. C. Burghardt, MT May 91, p140-153.

Sealants
Comparisons of Silicone and Urethane Sealant Durabilities, L. Bogue Sandberg, MT Nov. 91, p278-291.

Shear modulus

Transverse Isotropy Modeling of 3-D Glulam Timber Beams, J. F. Davalos, J. R. Loferski, S. M. Holzer and V. Yadama, MT May 91, p125-139.

Silica

Abrasion Resistance of Concrete, P. Laplante, P. -C. Aïtcin and D. Vézina, MT Feb. 91, p19-28.

Size effect

Effect of Aggregate and Specimen Size on Fracture Properties of Dam Concrete, Victor E. Saouma, Jerry J. Broz, Eugene Brühwiler and Howard L. Boggs, MT Aug. 91, p204-218.

Fracture Model Evaluation of Dam Concrete, Eugene Brühwiler, Jerry J. Broz and Victor E. Saouma, MT Nov. 91, p235-251.

Skin

Effect of Curing and Composition on Outer Skin of Concrete, A. Bentur and C. Jaegermann, MT Nov. 91, p252-262.

Slip

Generalized Model for Lateral Load Slip of Nailed Joints, Patrick J. Pellicane, Jeffery L. Stone and M. Daniel Vanderbilt, MT Feb. 91, p60-77.

Strength

Effect of Curing and Composition on Outer Skin of Concrete, A. Bentur and C. Jaegermann, MT Nov. 91, p252-262.

Strength and Durability of Sulfur Mortar, Abdul-Hamid J. Al-Tayyib, Moneer F. Tewfik and Mohammad Shamim Khan, MT May 91, p154-164.

Strength, Toughness: Mineral Wool-Polyethylene Pulp-Reinforced Mortars, Robert Nicholls, MT Nov. 91, p320-330.

Structures

Fatigue Crack Initiation—Propagation Reliability Model, W. Scott Martin and Paul H. Wirsching, MT Feb. 91, p1-18.

Ultimate Bending Strength of Composite Beams, Ever J. Barbero, Shin-Ham Fu and Ioannis Raftoyiannis, MT Nov. 91, p292-306.

Sulfur

Strength and Durability of Sulfur Mortar, Abdul-Hamid J. Al-Tayyib, Moneer F. Tewfik and Mohammad Shamim Khan, MT May 91, p154-164.

Temperature

Strength and Durability of Sulfur Mortar, Abdul-Hamid J. Al-Tayyib, Moneer F. Tewfik and Mohammad Shamim Khan, MT May 91, p154-164.

Temperature effects

Confirmation of TICC Damage Hypothesis—Petrographic Study, Alfarabi Sharif, MT Aug. 91, p179-188.

Early Age Properties of Pozzolanic Mortars under Hot Weather, Jihad S. Sawan and Hisham Y. Qasrawi, MT Aug. 91, p165-178.

Tensile strength

Pseudoductility of Fiber Reinforced Concrete, Antonio Nanni, MT Feb. 91, p78-90.

Testing

Fracture Model Evaluation of Dam Concrete, Eugene Brühwiler, Jerry J. Broz and Victor E. Saouma, MT Nov. 91, p235-251.

Review of Variables that Influence Measured Concrete Compressive Strength, David N. Richardson, MT May 91, p95-112.

Thermal stresses

Confirmation of TICC Damage Hypothesis—Petrographic Study, Alfarabi Sharif, MT Aug. 91, p179-188.

Timbers

Transverse Isotropy Modeling of 3-D Glulam Timber Beams, J. F. Davalos, J. R. Loferski, S. M. Holzer and V. Yadama, MT May 91, p125-139.

Torsion

Transverse Isotropy Modeling of 3-D Glulam Timber Beams, J. F. Davalos, J. R. Loferski, S. M. Holzer and V. Yadama, MT May 91, p125-139.

Toughness

Pseudoductility of Fiber Reinforced Concrete, Antonio Nanni, MT Feb. 91, p78-90.

Strength, Toughness: Mineral Wool-Polyethylene Pulp-Reinforced Mortars, Robert Nicholls, MT Nov. 91, p320-330.

Uncertainty analysis

Uncertainty in Flexural Capacity Prediction of Ferrocement Elements, Ser-Tong Quek and Seng-Hooi On, MT Nov. 91, p263-277.
